

## Defence Technical Project Manager

### Introduction

Net Consulting (NCL) are seeking a Defence Technical Project Manager to join our defence team on a permanent basis in Corsham.

Net Consulting provide managed services to the public and private sectors, helping organisations perform optimally and securely. We are at the heart of supporting the Ministry of Defence deliver their digital backbone and unleash the power of Defence's data.

As a Defence Technical Project Manager, you will be responsible for helping to transform our customer experience, taking responsibility for the delivery of customer projects within our Defence division and overseeing internal projects. The ideal candidate will be passionate about Project Management and excited by challenges presented when working on customer or internal projects. The position requires experience within the IT Defence sector.

Our roles are only available if you hold UK Security Clearance.

### Key Accountabilities & Responsibilities

The successful candidate will be able to demonstrate experience and competence in Technical Project Management within the Defence sector. You will be able to both define new projects and inherit existing projects, managing them autonomously to achieve the project objectives

- The successful candidate will have a strong technical understanding in one of the following technical disciplines (or similar):
  - Cloud Computing, Network Engineering, DevOps or Service Management
- You will be responsible for delivering several specific projects of varying complexity (both customer facing and internally) on time and ensuring they are managed within budget
- You will be committed to delivering project outcomes, ensuring projects and related processes are running smoothly at all times
- You will coordinate activities, resources, equipment, & information and be responsible for finding solutions to solve unexpected problems
- You will manage the financial aspects of the project to ensure profitability thresholds are delivered
- You will be liaising between internal & external stakeholders to schedule and create Project Plans and see them through from end-to-end, capturing project data and reporting to the customer and stakeholders

### Person Specification

- Defence Technical Project Management experience, ideally within IT Professional Services or Managed Services
- Strong technical understanding in one of the following technical disciplines (or similar):
  - Cloud Computing, Network Engineering, DevOps or Service Management
- Experience of working in customer-facing roles
- Experienced in managing internal transformation projects
- Strong communication, excellent planning and organisation, and time management skills
- Experienced at presenting internally to senior management and externally to customers
- Good understanding of project management methodologies (e.g. Agile, PRINCE2)
- Project Management related degree (or significant Professional experience)

## Company Benefits & Perks

- Competitive Salary
- Workplace Benefits: Contributory Pension Scheme, Private Medical Insurance, Life Assurance, Critical Illness Cover, Health & Wellbeing
- 25 Days' Annual Leave (in addition to Bank Holidays)
- Performance Bonuses (Personal & Company)
- Excellent Career Progression Opportunities
